They sense the fact, also, that American progress means their enrichment in matters material, and that by disposing of a part of their lands to Gentiles, they have been made comfortable for the remainder of their days, while their holdings continue to increase in value under the beneficent influence of Americanism.

lowing pithy style:

We propose to wage a vigorous campaign this fall in the county with the confident hope of victory. We promise to carry on the same policy of progress, reform, and public improvements in the county that has marked the course of the American municipal administration during the past five years. It will not be an administration given up to favoritism. The public highways must be macadamized or otherwise improved, and the work of betterment must not be confined to the immediate neighborhood itism. The public highways must be macadamized or otherwise improved, and the work of betterment must not be confined to the immediate neighborhood where the county commissioners reside. The people of the city and the people of the city and the people of the county districts are entitled to a system of first-class roads, running out to every hamlet and town. To do this it will be necessary to increase taxation. It will, however, compel an equitable revision of property valuations, which have been unfairly fixed in the interests of favored individuals and concerns. It will also involve some retrenchment in the manner of conducting county offices, where numerous incompetents are kept on the payrolls without a semblance of justification.

If we are entrusted with the county government, we will do what has been done in the city in the matter of giving a fair administration of the laws without favoritism, and we promise that as soon as we inaugurate our policies in the county was will be county will we as such a first administration of the laws with the county you will see such a first and the county was will be county you will see such a first.

The Last Valois King of France. With the death of Henry III. of France, on July 22, 1589, who was stabbed by acques Clement, a Dominican also died he house of Valois, that had so longuled France. Henry's mother, the amstitude Catherine de Medici, had preceded din to the craw at the darket resident. him to the grave at the darkest period of her son's career, and with the ascension of Henry IV. there began a new era for all Europe. Henry was only 28 years old when he met his tragic death. He early displayed a talent for military affairs. His prowess in this line attracted the attention of the Polish noblity and resulted in securing for him his tracted the attention of the Polish hooli-ity and resulted in securing for him his first taste of sovereign power by an elec-tion to the throne of Poland and a brief reign in Warsaw.

His departure from France seemed to

be the signal for a renewal of the in-ternal strife in that country. The king, who had nover been himself since the massacre of St. Bartholomew's day, was seen to be dying; the Duke of Alencon, as heir-presumptive, was vexed at the treatment he was receiving; and, no sooner had the peace of La Rochelle beer concluded, than it became evident that Catherine de Medlei was plotting the destruction of the middle party. Finally, she arrested Alencon, Montmorency and Henry of Navarre. Then Charles IX. dled and the crown passed to his next brother, in 1574.

Henry of Navarre. Then Charles IX. dled and the crown passed to his next brother, in 1574.

This was the signal for the character of Henry III. to show itself in its real colors. Glad enough to get away from Poland, he made no haste about returning to France and idled away several menths in dissipation in Italy. Then he threw over the cause of the Huguenots and attached himself to that of the Guises. But the Politiques formed an alliance with the reformers and, having chosen the Prince de Conde as their leader, presented, upon the escape from Paris of the King of Navarre, a solid front that might well have dismayed their rivais, even to the queen mother and her favorite son, the king. At best, it was all that Catherine could do to end the war that followed with any show of honor to her side. Henry was giving himself entirely to his pleasures and it was his mother who had to make the peace of Chastenoy (1576), granting free worship throughout France outside of Paris, and other concessions to all her opponents.

The party of the king was not, however, thus easily to be overcome. The Catholic League was formally announced with Henry. Duc de Guise, at its head the common folk were won to its standards, and, established first in Pleardy and then in Faris, it soon spread throughout the land. The states general were unable to give peace to the land and the year 1577 saw another little war, the conclusion of which the league refused to recognize. In 1578 the king's brother, the new Duke of Anjou, made friends with the Calvinists in the Netherlands, and, Henry being too favorable to the league in succeeding "Gallants' War, offered him an elusive sovereignty over the seven united provinces and got him to sign the trenty of Fleix in 1580, which angered him an elusive sovereignty over the seven united provinces and got him to sign the tenty of Fleix in 1580, which angered him an elusive sovereignty over the seven united provinces and got him to sign the trenty of Fleix in 1580, which angered him an clustice sovereignty ove

to sign the trenty of Fleix in 1580, which angered his own friends.

Thus the king was now at odds with the league and it behooved the latter to bind him fast. The dearth (1580) of the Calvinistic Anion left Henry the last of the house of Valois. Though young, he was childless, and likely to romain so, and unless the Salle law could be set aside, Henry of Navarre would become the next ruler of France. Guise at once saw the crown within his own grasp. He accordingly sold himself and the league to Philip of Spain in return for support from that monarch; caused the assassination of William the Silent; sought the lives of Elizabeth of England and the future Henry IV. of France; or nized a very modern "machine" and fasced the king to sign with it the treaty of Nemeurs, whereby Henry III became his slave.

The next move was to pit Navarre and the king one against the other and this was done by the "War of the Three against Navarre The came boldly to the front. His cause was encouraged by the execution of Mary of Scotland and what aid England dared to furnish, and though the tide set at first in favor of the leaguers he won the battle of Coutras, where the Duc de Joyeuse, a faverite of his rival, was killed. Guise, on the other hand, drove back the German allies of Navarre at Yimroy and Auneau, entered Paris in triumph and, having openely differed with the king, forced that monarch to retire to Chartres, where he again humbled himself, much against his will, to the demands of the league in the "Edict of His front.

Union" (1588), naming Guise lieutenant general of the kingdom and declaring that no member of the reformed faith abould succeed to the throne.

Rankling under the shame of all this, Henry III. appealed to that weapon of the weak the knife of the assassin. That very winter he caused the murder of the Duke and Cardinal of Guise, selzed many of the leaders of the league and threw himself into the arms of Navarre, only himself to fall a victim to the dagger of Jacques Clement, a half-witted priest. The dying king had just time to commend Navarre to his followers as his successor and to exhort him to achis successor and to exhort him to a cept the Roman faith when he died.
